Special features BREEAM

Construction period
6 months

Start work
01-2016

End of work
07-2016

The new store has been built on stilts. This is because the space available at ground level is relatively restricted, and it's absolutely essential to combine a large selection of products with a large free car park. The store's floorspace is 2,600 m². In addition, much attention is paid to ecological aspects. This is achieved in part by making maximum use of daylight for store lighting (by means of "sheds") and a switch over to artificial lighting that's designed to use pure LED technology – when and only when the natural light is insufficient. Moreover, the building is BREEAM-certified.
