LPG ethane tank storage park ATPC - Antwerp

Project Details

Activities
Civil Engineering
Heavy industry

Contractors
Willemen Bouw
Willemen Infra

location
Beliweg
2030 Antwerpen Belgium
Antwerpen BE

Client
ATPC

Construction period
9 months

Start work
10-2018

End of work
07-2019

With the construction of a 30,000 m² LPG-ethane tank storage facility, Antwerp Terminal & Processing Company (ATPC) significantly expanded its petroleum and petrochemical storage facilities at the port of Antwerp. The huge tanks are designed to store ethane, propane, butane and derivatives. This investment makes ATPC a major player in the ARA storage market for LPG and ethane. For this project, the concrete foundations (9,000 m³ of concrete and 1,600 tonnes of reinforcement) and infrastructure works were carried out by us.

Willemen Infra is a leading, Belgian road construction company with a regional presence in both Flanders and Wallonia. An important asset is that we have all aspects of the construction process under our own management and thus fully control the execution. Moreover, our team of 1,000 well-trained and experienced employees are willing to work at night and over the weekend to make sure they get everything done in time. In addition, thanks to our own COPRO and CSC-certified production and recycling sites, we are one of the leading producers for asphalt and road concrete.
