8000 Brugge Belgium
West-Vlaanderen BE

Client
Agentschap Wegen en Verkeer

Temporary partnership
Via A11

Construction period
3 years 5 months

Start work
03-2014

End of work
08-2017

Project website

On 1 September 2017, the 12-kilometre-long A11 between Bruges and Knokke-Heist opened to traffic. This motorway with connection complexes at the port of Zeebrugge, among others, separates economic from passenger traffic. The movable bridges over the Boudewijn Canal - a unique feature in Belgium - use the latest technologies to coordinate road traffic and shipping. For cyclists, additional bicycle lanes and new bicycle tunnels were provided. This PPP and DBFM project was completed nicely within the specified timing.

Willemen Infra is a leading, Belgian road construction company with a regional presence in both Flanders and Wallonia. An important asset is that we have all aspects of the construction process under our own management and thus fully control the execution. Moreover, our team of 1,000 well-trained and experienced employees are willing to work at night and over the weekend to make sure they get everything done in time. In addition, thanks to our own COPRO and CSC-certified production and recycling sites, we are one of the leading producers for asphalt and road concrete.
