AP Hogeschool Antwerpen

#### Architects

POLO Architects

#### Engineering Office

Jan Van Aelst (stabiliteit), VK  
Engineering (speciale technieken)

#### Construction period

1 year 8 months

#### Start work

03-2020

#### End of work

11-2021

Construction of a new campus for AP University of Applied Sciences and Arts. The Viaduct Campus offers room to 2,000 students across 7,500 m<sup>2</sup> of space. The new campus borders the park, and this green theme is extended into the building through the large windows. Parking space for 50 cars and 400 bicycles is provided underneath the new building. During the design phase, special attention was paid to the environmental footprint of the project. Passive sun protection, solar panels, green roofs and exhaustive insulation will be integrated into the building to create a pleasant indoor climate. The centre of the building features a real garden that will give the impression of an 'urban jungle'.

### Willemen Construct

Boerenkrijgstraat 133
