

Antwerpen-Zuid Station - Antwerp

Project Details

Activities

Civil Engineering
Railway infrastructure & stations

Contractors

Willemen Construct

Location

Kolonel Silvertopstraat
2020 Antwerpen Belgium
Antwerpen BE

Client

NMBS

Architects

NMBS

Engineering Office

NMBS

Construction period

2 years 7 months

Start work

11-2022

End of work

06-2025

The existing accesses (concrete stairs and escalators) to the platforms in Antwerp South station will be demolished and replaced by a bicycle lift and precast concrete stairs.

We are also building a new bridge with on-site poured abutments, piers and lift shafts topped by precast concrete girders. Once completed, the annexed bridge will serve as a covered bicycle shed.

A special feature of the project is the train environment, which will involve a lot of phasing and weekend work
