Tank Storage Facilities Sea-Tank - Antwerp

Project Details

Activities
Civil Engineering
Heavy industry

Contractors
Willemen Bouw
Willemen Infra

location
Mannheimweg
2030 Antwerpen Belgium
Antwerpen BE

Client
Toseanergy

End User
Sea- Invest

Engineering Office
BM Engineering

Surface area above ground
29 000m²

Start work
08-2017

Sea-Invest and French chemical giant Total invested heavily in the expansion of Sea-Tank's tank storage facility in the port of Antwerp. A huge park with 800,000 m³ of storage tanks for various oil products, was enlarged to over 1 million m³. Sea-Invest purchased a 17-hectare site for this purpose.

We were responsible for the construction of the foundations of eight new storage tanks with a total storage capacity of 160,000 m³ and the associated basins. The tanks were equipped with laying rock and a pipeline to the Total refinery thirty metres below the Hansa dock. We also took care of the supply and placement of the sand asphalt.

Willemen Infra is a leading, Belgian road construction company with a regional presence in both Flanders and Wallonia. An important asset is that we have all aspects of the construction process under our own management and thus fully control the execution. Moreover, our team of 1,000 well-trained and experienced employees are willing to work at night and over the weekend to make sure they get everything done in time. In addition, thanks to our own COPRO and CSC-certified production and recycling sites, we are one of the leading producers for asphalt and road concrete.
